

DROP-IN LOOP HANGER

CERTIFICATIONS

FEATURES

Next generation loop hanger revolutionizes the installation of pipe

Once on the guide arm, the weight of the pipe opens the self-closing latch and effortlessly guides the pipe into place

Integrated rubber sleeve is designed to provide additional grip when adjusting hanger height and reduce hanger rotation around the barrel nut

Eliminates the need to disassemble the hanger during installation

Allows prefabrication of complex assemblies with fittings and branch lines that previously could not be installed in one piece

Designed to reduce overhead work for a safer, less strenuous installation

Flared edges help prevent sharp surfaces from coming into contact with the pipe

Retained insert nut helps ensure the loop hanger and insert nut stay together

Recommended for the suspension of stationary non-insulated pipe lines

Manufactured to use the minimum rod size permitted by NFPA® for fire sprinkler piping

Conforms with Federal Specification WW-H-171 (Type 10), Manufacturers Standardization Society (MSS) SP-58 (Type 10)
