

## HOT AISLE RETURN PLENUM 800MM, 1480X800X75, BLACK, POLYCARBONATE

### CATALOG NUMBER

**PCPPS800**

Works with a pod of cabinets surrounding a hot aisle. It is supported on top of the cabinets and channels the hot air exhausted from the server equipment housed inside the cabinets up to a ceiling plenum. This is used to completely separate the hot from cold air, drastically reducing data center energy costs.

It is designed to be sold as a build-to-order system that consists of side panels, end panels, and used with the ProLine Express Aisle Doors.

### INDUSTRY STANDARDS

UL94

### FEATURES

Drastically reduces data center energy costs

Reduces data center carbon footprint

Quick and simple installation

Custom built to facility specifications

Channels hot air from hot aisle to a facility ceiling plenum

Separates hot from cold air, preventing intermixing
