

# NVENT ERIFLEX FLEXBUS FIRESTOP BLOCK FBB

## CERTIFICATIONS

### FEATURES

Highly-elastic moldable block
Easy access for difficult-to-reach openings
Age, smoke and damp resistant
Re-enterable and repairable
Excellent adhesion
No backing material required
F-rating / E-rating up to 2 hours
T-rating / I-rating up to 2 hours

## **SPECIFICATIONS**

Color:	Red;Brown		
Width (W):	450 mm Max		
Height (H):	500 mm Max

FLEXFIREBLOCKUL	508154		0.56 kg	CE, cULus Classified, RoHS, ESTI ERIFLEX FleXbus	

## ADDITIONAL PRODUCT DETAILS

The thickness of the penetration seal has to be minimum 200mm, depending on the fire resistance classification (see Annex J-1 of the ETA) in order to obtain EI120 fire-resistance.

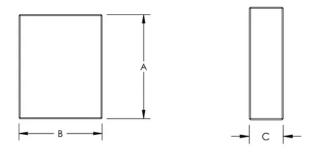

If 200mm is not possible, the FIB (intumescent wrap) needs to be used around the FIeXbus Conductors and with 150mm width on both sides in order to reach EI120 fire resistance.

The width and height is referring to the maximum opening size of the penetration seal.

The total cross section of the installation (including insulation and conductor) must not be more than 60% of the opening size of the penetration seal.

The first support for the FleXbus Conductor has to be at a maximum 200mm measured from the surface of the penetration seal.
