

LHX+ CONTROL UNIT

The Control Unit enriches the LHX+. It connects to the LHX+ sensors and the motorized coolant valve 23130-607. This enables the cooler to control the coolant air flow based on a chilled (supply) air temperature setpoint. It provides advanced remote monitoring functionality and various setup features.

FEATURES

Coolant flow control based on chilled (supply) air temperature setpoint. More control features with water control package

Separate, compact 19" control unit without loose wires in upper cabinet section

Clearly marked plug & play sensor connections
