AIR FLOW SENSOR

Air Flow sensors are accessories attached to nVent Enlogic iPDUs that enable remote air flow monitoring. They provide diagnostic information via Web UI, SNMP, CLI/SSH interfaces. The administrators can set remote displays, sensor threshold values, alarms, SNMP traps and email, event log and syslog notifications to monitor the air flow in the data center. Air Flow sensors are used along with many equipment and devices from the industries such as: Medical. Safety, Power, Aviation & Space, Transportation, Nuclear Power.
