# nVent CADDY Adjustable Depth Multi-Gang Masonry Open Back Box

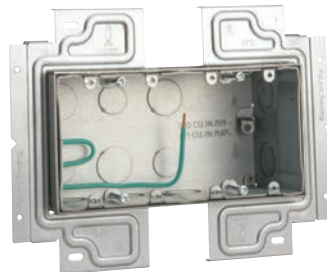

Three Gang

Five Gang

Six Gang

Four Gang

The nVent CADDY Adjustable Depth Multi-Gang Open Back Box incorporates several innovative features to create a cost-effective solution for installing up to six devices in a single box. The box is designed with a masonry style front, eliminating the need for a mud ring. By incorporating an inner ring, the depth is fully adjustable from ½ to 1½ inches. Installers have the ability to remove the back of the box for easy access to device wiring. In addition, the box can be mounted direct-to-stud or assembled between-stud with the nVent CADDY Heavy Duty Between-Stud Bracket.
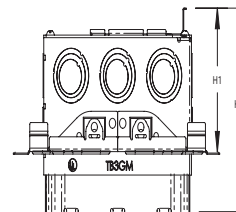

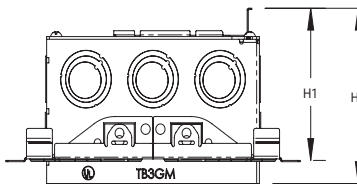

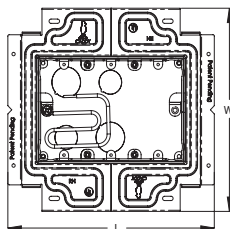

FEATURES

- Adjustable mud ring design accommodates various thicknesses of drywall and can be adjusted after installation
- Snap-on installation to nVent CADDY Heavy Duty Telescoping Bracket allows for easy positioning along bracket
- Features ½, ¾, and 1 in multiple knockouts on the top and bottom; and ½ and ¾ in multiple knockouts on the side
- Choose between four different size options: three, four, five and six gang
- Can be mounted directly to metal studs
- Integral far-side support for on-stud mounting up to 6 in stud depths
- Innovative box lock tab secures box to bracket during assembly

Finish: Pregalvanized
Material: Steel
