

nVent CADDY Pyramid Prefab H-Frame

Save time, improve productivity and achieve peace of mind with nVent CADDY Pyramid Prefab H-Frames. Increase safety and efficiency during service runs for commercial rooftop installations compared to traditional methods.

BENEFITS

- Utilize premium nVent CADDY PHB post bases for superior membrane interface and load rating/weight distribution
- Hot-dip galvanized, and UV stabilized for long-lasting performance
- Available as precut strut with hardware and full prefab assemblies
- Easily adjustable height using simple hand tools/impact wrench
- Foam or rubber bottom offers low abrasion interface for superior roof membrane protection
- Full design engineering services available - custom drawings, layouts, calculations and PE stamping capabilities

Work Smarter on the job:

SAFE

- Reduce risk with less time spent on elevated surfaces
- Avoid fabrication hazards and time spent handling framework on the job

FAST

- Eliminates lengthy fabrication times; simply install frame assembly and move to next support
- Increase productivity efficiency and reduce time spent un-skilled tasks

EASY

- Full project design and layout package available to reduce complexity
- Cost-effective alternative to traditional full prefabrication

Need a more custom solution to meet the needs of your next prefabrication project?

You can now digitally configure a fully customized solution online with the nVent CADDY Pyramid Prefab H-Frame configurator software.
